Midterm Presentation
Presentation Date: February 7th, 2022

ENRoute is a mobile Application to easily locate compatible electric vehicle chargers based on the user's given preferences.

The presentation will cover an overview of our development team, client, problem statement, the tools we used, the app's functional and non-functional requirements along with their justifications, followed by detailed designs of our GUI, database, and software architecture. Finishing the presentation will be a Gannt chart going over the upcoming development schedule, and a brief summary

The presenters will be:
Kirsten Boyles, Joe Corona, Richard DeYoung, Craig Turnbull,
and Lucas Keizur
